

## SkyMail® for Travel Expenses

### Case Summary

#### Challenge

How to keep track of expenses associated with business or personal travel while on the go.

#### Solution

SkyMail helps document expenses as they happen, cutting down on lost details.

---

### The Background

Most of the USA's 10M traveling executives, 8M sales people, and millions of other field based workers in construction, transportation and general business services incur expenses associated with work and personal travel expenses for charitable endeavors may qualify for tax deductions.

### The Challenge

Track expenditures made on behalf of the company or organization. Whether an expense is incurred on a company credit card, personal credit card or with cash, the company and/or government requires that the purpose and type of the expense, the amount, and persons attending (if applicable) are documented.

### The Solution

SkyMail's "no typing" email messaging provides a real time method of reporting expenses. *Expenses* or similar designation is set up as a Contact in the mobile phone book and expenses are reported as they happen. Each voice message is delivered to the email address designated. Typical expenses might be "\$29.14 for lunch at Sam's Café - meeting with Jose to discuss next quarter's goals and objectives" or "56 miles to Literacy Group training meeting". Each SkyMail is documented with a date and time stamp in the email which makes tracking easy.

### Customer Benefits

- Cash expenses with no receipts, such as room and porter tips, are accounted for
- Tax related expenditures are grouped together
- Less time spent on recreating events and expenses
- Better accountability since each SkyMail has date and time documentation

### About SkyMail

Powered by Pacific DataVision, SkyMail allows users to send an email anywhere in the world via their cellular phone, with no typing required. The recipient receives an email with a voice message and a text reply box, enabling them to reply with a text message directly to the sender's phone.

SkyMail messages can be sent to individuals or groups of up to 50. All messages are documented and stored online for record keeping and accountability. Find it at
